The County Executive's FY 2026 Proposed Capital Improvement Program (CIP) Budget expenditures for the Board of Education (BOE) total \$215,705,000, an increase of \$42,913,000, or 24.8%, over the approved budget expenditures for FY 2025. FY 2026 funding is proposed at \$247,608,000, an increase of \$56,318,000, or 29.4% over the approved FY 2025 budget. There is an additional \$42,600,000 in the 'non-departmental' Operating Budget to support the second phase of the Alternative Construction Financing for school construction.

FY 2026 Funding Sources

County Sources

- **The FY 2026 allocation totals \$145,322,000, representing 58.7% of the total CIP funding.**
- County Sources are provided through General Obligation (GO) Bonds. GO Bonds account for 58.7% of FY 2026 funding sources and 65.9% of total project funding.
- The County can issue General Obligation Bonds to the extent that:
 - 1) The ratio of net direct bonded debt to assessed value will not exceed 3.0%, based on full market value; and
 - 2) The ratio of General Fund net debt service costs (i.e., principal and interest payments less recoveries) to General Fund revenue will not exceed 8.0%.
- A historical chart of GO Bond funding is found below:

State Sources

- State sources are the second-largest funding source for the Board of Education’s CIP projects. **The FY 2026 allocation totals \$102,286,000, representing 41.3% of the total CIP funding.**
- State-funded construction projects are approved through the Interagency Commission (IAC) on School Construction. The agency allocates funding for all 24 Maryland jurisdictions and the Maryland School for the Blind.
- A historical chart of State funding is found below:

- PGCPs noted the following enacted State legislation that may impact operations:
 - SB 149 / HB 128: *“Climate Change Adaptation and Mitigation - Total Assessed Cost of Greenhouse Gas Emissions - Study and Reports.”*
 - Lays the groundwork for future clean energy retrofit mandates.

Other Sources

- The “Other” funding source includes Video Lottery Terminal (VLT) funding and PAYGO.
- The BOE notes that VLT projects are chosen by generating a list of priority projects based on need across all schools in any given County-funded category and then considering a list of those same most-needed projects near MGM and/or Rosecroft for specific funding eligibility.
- There are no proposed “Other” funding sources for FY 2026.

Unspent State and County Allocations from Past Fiscal Years

- **The BOE has unspent State allocations going back to FY 2016.** This includes 39% of the FY 2023 allocation, 14% of the FY 2024 allocation, and 35% of the FY 2025 allocation. A breakdown of unspent State funding is below:

| Unspent State/Other Allocated Funds | | | |

| Fiscal Year | Unencumbered | Encumbered | Total Unspent |
| 2016 | 26,329 | - | 26,329 |

| Total | \$ 144,678,658 | \$ 49,604,589 | \$ 194,283,247 |

- A further breakdown by project is provided in response to *First-Round Budget Review Question #9a*.
- **The BOE has unspent County construction allocations going back to FY 2009.** This includes 10.1% of the FY 2020 allocation, 14.0% of the FY 2021 allocation, 13.6% of the FY 2022 allocation, 17.6% of the FY 2023 allocation, 14.1% of the FY 2024 allocation, and 26.1% of the FY 2025 allocation. A breakdown of unspent GO Bonds and “Other” Sources is below:

| Total | \$ 166,771,245 | \$ 128,187,586 | \$ 294,958,831 |

- A list of categories with unspent allocations is found as a response to *First-Round Budget Review Question #8a*.
- The Interagency Commission (IAC) on School Construction estimates that unspent allocations lose an estimated 5% of their value every year they remain unspent due to inflation.

Video Lottery Terminal (VLT) Projects

- **PGCPS has \$2,244,382 unspent in VLT-funded project allocations.** Projects identified by Council resolutions for VLT funding construction have been completed with other sources.
- Because VLT funding is allocated through County Council action, additional legislation would be needed to either “cancel” or “reallocate” unspent VLT funds.
- A reprogramming request for VLT funding was submitted to OMB on March 14, 2025. The request requires Council approval before the allocation is redirected to other projects. Details of the request can be found in response to *First-Round Budget Review Question #6*.
- The Prince George’s County Office of Management and Budget (OMB) noted that the school system is reimbursed for these projects after the cost is incurred.

Proposed FY 2026 Budget Expenditures

Project Delays

- PGCPS has consistently noted construction delays due to several factors:
 - Lack of adequate modernization-level funding.
 - Permitting delays from the different reviewing agencies (among them: Maryland State Department of Education (MSDE), Department of Permitting, Inspections, and Enforcement (DPIE), Washington Suburban Sanitary Commission (WSSC), Maryland Department of the Environment (MDE), Interagency Commission on School Construction (IAC), and Soil Conservation District (SCD)).
 - Supply chain issues resulting from the COVID-19 pandemic.

School Construction and Renovation Projects

- The BOE lays out the following process for selecting which schools are to receive funding in any given year:
 - Asbestos, ADA Upgrades, Buried Fuel Tanks, Code Corrections, Lead Remediation, AC-HVAC, Major Repairs, Parking Lots, and Playgrounds are selected by a Planning Team.
 - The Department of Capital Programs meets with Building Services to analyze data compiled throughout the year from the Work Order System, Facility Coordinators, Planners, and Leads from each of the nine (9) Building Services shops.

Selection of Schools

- PGCPS outlines the following process to select which schools will undergo modernization or replacement:

- 2008: Parsons/3D International performed a Conditions Assessment of facilities at least 10 years old at the time of inspection. Additional facilities were added with an update in 2012.
- A scoring system was developed using two formulas:
 - A standard Facility Condition Index (FCI) formula:

$$\frac{\text{Current Cost of Repair}}{\text{Replacement Value}}$$

- The Extended Facility Condition Index (EFCI) formula:

$$\frac{\text{Current Cost of Repair} + \text{Projected Capital Renewal}}{\text{Replacement Value}} = \text{Total Deficiencies}$$

- With the formulas identified above, the FCI score is categorized into Good (0-40%), Fair (40-75%), or Poor (>75%).
- 2014-2015: A Master Plan Support Project was conducted, combining condition data along with enrollment, facility size, utilization, and other factors to create an “Educational Adequacy Score.” Master Plan recommendations were formed using the Weighed Facility Condition Index (WFCI) formula below:

$$\text{WFCI} = [(\text{Impact FCI} \times \text{Weighing}) + (\text{Difficulty FCI} \times \text{Weighing}) + (\text{Def Category FCI} \times \text{Weighing}) + (\text{Priority FCI} \times \text{Weighing})] \times 100.$$

- The cycle schedule developed in the 2017 EFMP was created based on prioritizations of WFCI.
- PGCPs also notes that “**there is no strict formula.**” The current plan was created with the goal of modernizing 133 schools over 20 years at a cost of \$8.5 billion. Preference has been given to projects that relieve overcrowding.
