Individual and Resident Safety Net

Food Assistance Provider Capacity and Coordination

Government Agency Systems Response

Strategic and Long-Term Food Systems Planning

Report Recommendations

Action Plan Overview

Recommendation	Overview of recommendation
Rational/evidence	Evidence-based research to support recommended action
Policy pathways	1-3 proposed policy options to implement the recommendation ✓ Executive/Agency Action ✓ 2022-23 County Budget or Future Budget ✓ Legislation
Audience/reach	Number of county residents that will be impacted
Expected cost	Estimated cost for implementation
Funding source	Proposed funding source for implementation
Lead partner	Proposed lead organization to implement recommendation or serve as lead convener Partner organization (either funded or unfunded) who will play a significant role in implementing recommendation
Barriers/limitations	Potential barriers to implementation
Recommended steps	Suggested key events or actions to initiate implementation
Key considerations for equity	Questions to guide implementation and to increase equitable opportunities to populations served and avoid unintended consequences or impacts
Resources for further reading	Suggested key resources or regional models

Foundational Recommendations

A: Create and fund a County Food Security Office

B: To inform and drive county food security decisions, gather, analyze and use data sources and systems

C: Increase participation in federal nutrition assistance programs

D: Develop a master communication strategy for food security, resilience, and emergency preparedness

“A critical responsibility of the Food Security Office will be to collaboratively lead, coordinate, and communicate food security needs and resources.” – FSTF Report

A: Create and fund a County Food Security Office

Recommendation:

Create a Prince George's County Food Security Office tasked with coordinating County agencies, securing funding, and engaging with community organizations to design and implement food security structures that facilitate a healthy, equitable, and sustainable food system.

Policy Pathway:

- ✓ Executive/Agency Action
- ✓ 2021-2022 County Budget

Case Study:

The City of Baltimore has proactively undertaken an intergovernmental approach to collaboration on food issues.

B. Gather, analyze, and use data sources & systems to inform and drive County government food security decisions

Recommendation:

The Food Security Office will track and analyze relevant demographic data to identify and address current food security challenges and emergent needs. Robust data collection is imperative to document the needs of county residents, particularly under-resourced communities and those that have been historically marginalized.

Policy Pathway:

- ✓ Executive/Agency Action
- ✓ 2021-2022 County Budget

Case Study:

Montgomery County has developed an online food insecurity database, FoodStat, to enable government agencies and community partners to understand food security needs and vulnerability better.

C. Maximize resident participation in federal nutrition assistance programs and school meals

Recommendation:

The Food Security Office, the Prince George's County Department of Social Services, and Prince George's County Public Schools will coordinate efforts to increase enrollment in federal nutrition assistance programs and school meals. These programs are some of the most effective strategies for preventing and reducing food insecurity.

Policy Pathway:

- ✓ Executive/Agency Action
- ✓ Legislation

D. Develop a master communication strategy for food security, resilience, & emergency preparedness

Recommendation:

Develop a master food security/resilience communication strategy that ensures accurate and timely information is available in multiple languages at varying proficiency levels across trusted platforms (e.g., app, text, phone, print, internet, social media, word-of-mouth).

Policy Pathway:

- ✓ Executive/Agency Action
- ✓ 2021-2022 County Budget

Recommended Strategies

- 1) Plan for future food security disruptions by developing an emergency food security plan that integrates food system experts into existing emergency management operations.
- 2) Increase access to bulk food purchasing, infrastructure, and resources for food assistance providers.
- 3) Co-locate food security and social safety net services and create closed-loop referral systems.
- 4) Improve transportation options for residents to access healthy food retailers and provider.

Recommended Strategies cont'd

- 5) Leverage state and regional partners for cross-jurisdictional food systems planning, coordinated communication, and infrastructure development.
- 6) Provide land access, infrastructure and resources to help agriculture flourish.
- 7) Continue to provide and expand market incentives and support to healthy food retailers of multiple sizes in target communities.

A network diagram background consisting of a grid of light blue lines connecting various sized circles of different shades of blue and teal. The circles represent nodes, and the lines represent connections between them. The overall pattern is a complex, interconnected web.
