

aiEDU & Prince George's County Public Schools

Preparing Students for an AI-Driven Future

Our Mission

The AI Education Project (aiEDU) is a non-profit devoted to making sure that all students are ready to live, work and thrive in a world where AI is everywhere.

Founded

2019

Before ChatGPT, before
the current AI wave

National Reach

230K+

Students across
all 50 states

Our Approach

3 Pillars

Curriculum, professional
learning, & partnerships

PGCPS: A National Pioneer

2+

Years of Partnership

PGCPS was among the very first districts in the country to approach AI literacy as more than just putting tools in front of teachers and kids. They chose to be proactive making them one of the most forward-thinking districts we work with nationally.

3K+

Educators in PGCPS reached

40+

Events in PGCPS – PL's, conferences, meetings, etc

12+

External resources developed for PGCPS

This is not about getting kids in front of screens or chatbots.

It's about strategic change management helping teachers, administrators, parents, and the entire community understand what AI means for the future of our students. PGCPS is investing in professional learning first, building understanding before implementation, and engaging all stakeholders in a comprehensive AI strategy.

Preparing Students for The Future

Human Skills

- Critical thinking
- Creativity & innovation
- Collaboration
- Communication

AI Literacy

- Understanding AI impacts
- Informed decision-making
- Evaluating AI outputs
- Responsible use

Workforce Readiness

- Adaptability & resilience
- Problem-solving with AI
- Technical fluency
- Ethical reasoning

AI is reshaping the future in ways that are hard to predict. That's exactly why this work requires more than a technology solution it requires preparing the whole community.
