

BACKGROUND INFORMATION/FISCAL IMPACT

(Includes reason for proposal, as well as any unique statutory requirements)

Every four years, local governments are required by State Law to perform a comprehensive review of their Critical Area Program and propose amendments as necessary. The County's four year anniversary was January 15, 1992. Amendments are proposed to the Anti-Litter and Weed Ordinance in an effort to clarify existing regulations. Specifically, the program is being revised to clarify that certain vegetation is not considered weeds.
