The back of the hospital where there will be a paved walking path around the lake

Update on Specialty Services

We are amending our original CON consistent with State regulatory goals:

- We will relocate some behavioral health beds to the new hospital in White Oak and some to our regional specialty facility in Rockville.
- With this change, the rehabilitation unit in Takoma Park will also need to be relocated to White Oak with the new hospital.
- A 24/7 urgent care center will be developed in Takoma Park.
- Consolidating our services in this way will strengthen and ensure the continued viability of these services – especially behavioral health, a vital part of the region's healthcare infrastructure.

Transition Planning Underway

Transition planning ...

- Ensures a safe and effective move to White Oak
- Allows us to:
 - ✓ assess and revise operations and processes
 - ✓ plan and communicate logistics
 - ✓ orient and train staff ahead of move
- Logistics:
 - Estimated transfer of 100 patients
 - All patients moved in one day
 - Coordination with EMS and police
