TECHNICAL SERVICE PROGRAMS

Floodplain Management Services Program

Authority to provide planning-level technical assistance and analyses to federal, state and local agencies on flooding and floodplain management related issues.

Planning Assistance to States Program

Authority to assist states, local governments, Native American Tribes and other non-federal entities with planning-level technical guidance and analyses, in the preparation of comprehensive plans for the development and conservation of water and related land resources.

The Silver Jackets Program

Brings together interagency federal, state, and local stakeholders focused on sharing knowledge and collaborating on projects to reduce flood risk and enhance response and recovery.

TECHNICAL SERVICE PROGRAMS

Continuing Authorities Program

Authority to solve water-resource, flood-risk mitigation and environmental restoration problems in partnership with local sponsors without the need to obtain specific Congressional authorization. This program decreases the amount of time required to budget, develop and approve a potential project for construction. CAP allows USACE to plan and implement projects that are smaller, less complex and less costly.

Section 510 Program

Authority to provide design and construction assistance to non-Federal interests in the Chesapeake Bay watershed for water-related resource restoration and protection projects including projects for:

- Sediment and erosion control
- Protection of eroding shorelines
- Ecosystem restoration (including submerged aquatic vegetation)
- Protection of essential public works
- Beneficial uses of dredged material
- Other related projects that may enhance the living resources of the estuary
