Late renewals	from \$10 to \$15
To reinstate a permit	\$75/reg work day \$150/wknd or eve.
Vending Machine Permit	from \$50 to \$75

Comments were received from the following offices:

Office of Law - proper legislative form,
Office of Audits and Investigations - positive fiscal impact of approximately \$250,000 with the adoption of both CR-54 & CB-65,
Office of Management and Budget - anticipated fees have been included in revenue estimates for the Health Department, **and**
Health Department - supports, the legislation provides for a more equitable assessment of fees for food service facilities which is based on the nature and extent of the food handling operation at each facility. The legislation will lower permit fees for approx 425 facilities with a low priority hazard analysis critical control point assessment.

During review of the FY92 Health Department budget there was some discussion regarding the licensing of various food service facilities. Currently, certain facilities such as diet centers are charged the same rates as a full service restaurant. The new structure proposed in CR-65-1991 will help to better address facilities based on their food handling degree for example more time will be put into inspection of a full service type restaurant versus the inspection of a diet center establishment.

BACKGROUND INFORMATION/FISCAL IMPACT

(Includes reason for proposal, as well as any unique statutory requirements)

This bill will amend certain fines and fees charged by the Health Department for permits and inspections.
