

Hello my name is Mark Calhoan. I live at 6401 Floral Park Rd. Brandywine MD. 20613. I seek to appeal Specific Design Plan - SDP-2304 Saddle Ridge. My reasons for an appeal are on the following pages.

Appeal Notice

RECEIVED

AUG 15 2024

OFFICE OF THE CLERK
PRINCE GEORGES COUNTY MARYLAND

The stripping of trees and plant life, digging up the earth to place in pipes, and releveling of the ground for the purpose of changing waterflow will have a damaging effect on my water well and property.

The concerns of the water well is simple. It's water level. I currently have a 25ft. deep well. If the water level drops the well becomes inoperable. I will not under any circumstances will be doing business with the WSSC.

"Land Drainage"

Currently water from the street adds to the water in my front field and exits out onto the streetside of the property using the natural lay of land to move the water. Without that water way my property will flood.

"Foundation"

Any flooding, especially during tropical storm seasons, will not only damage the basement but foundation itself.

If the changes to landscape cause a rise in the water table under my property, it will destroy my foundation.

The water from my Property must be able to drain off into the Surrounding water ways in order for it to maintain its current condition
