

Hello my name is Mark Calhoun. I live at 6401 Floral Park Road Brandywine MD. 20613. I seek to appeal Specific Design Plan – SDP – 2304 Saddle Ridge. My reasons for an appeal are on the following pages.

The stripping of trees and plant, digging up the earth to place in pipes, and releveling of the ground for the purpose of changing waterflow will have a damaging effect on my water well and property.

The concerns of the water well are simple. Its water levels. I currently have a 25ft. deep well. If the water level drops the well becomes inoperable. I will not, any circumstances will be doing business with the WSSC.

Land Drainage

Currently water from the street flows into and adds to the water in the front field that then exits out onto the other side of the property using the natural lay of the land to move the water from one point to another. Without that water way the property will flood.

Foundation

Any flooding, especially during tropical storm season, will not only damage my basement but foundation itself. If the changes to the landscape cause a rise in the water table under my property it will destroy my foundation.

_The water from my property must be allowed to drain off into the surrounding water ways in order for it to maintain its current condition.
